

Smart Splice LLC

Splicing the World Together

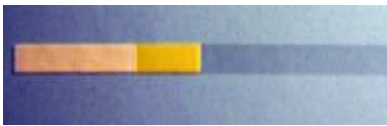

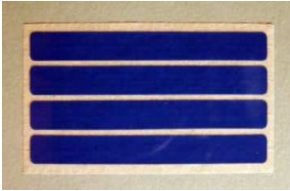

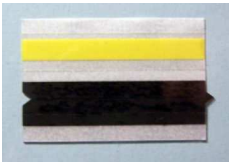

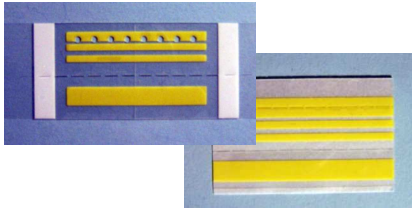

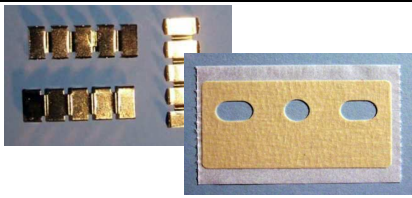

Featured Products Brochure

Here are our most popular products for splicing component tapes

By using tape splicing products from Smart Splice LLC, you can save time and money using your high speed automated assembly equipment, or even your low and medium volume equipment as well. No need to buy or maintain extra feeders and shut down a line to change reels. If you have automated assembly equipment, Smart Splice LLC has the RIGHT solution for you!

Featured Products	
	<h3>SMT Single Splice Tape</h3> <p>Can be used with either paper, plastic, or metal tapes, punched or formed pockets, and heat sealed or PSA cover tapes. In sizes to fit 8-24mm tape widths (multiple splices can be used for wider tapes).</p>
	<h3>SMT Single Splice Tape w/The Edge</h3> <p>Can be used with either paper, plastic, or metal tapes, punched or formed pockets, and heat sealed or PSA cover tapes. In sizes to fit 8-24mm tape widths. With the addition of the edge guide, it allows faster and more accurate placement of the splice tape.</p>
	<h3>SMT Double Splice Tape</h3> <p>Can be used with either paper, plastic, or metal punched tapes, and heat sealed or PSA cover tapes. In sizes to fit 8-16mm tape widths. Alignment can be done without tools using the pre-spaced dimples in the hard plastic card.</p>
	<h3>SMT Double Splice Tape w/Holes</h3> <p>Can be used with either paper, plastic, or metal tapes, punched or formed pockets, and heat sealed or PSA cover tapes. In sizes to fit 8-44mm tape widths. Double splice tape for top cover and bottom cover/carrier tape that also includes extra tape over sprocket holes.</p>
	<h3>SMT Clip and Splice Tape</h3> <p>Can be used with either paper, plastic, or metal tapes, punched or formed pockets, and heat sealed or PSA cover tapes. In sizes to fit 8-24mm tape widths. An innovative design with a brass clip and single splice tape on one plastic card.</p>

Smart Splice LLC

	<h3>SMT Brass Splice Clip</h3> <p>Can be used with either paper, plastic, or metal tapes, punched or formed pockets, and all tape sizes. Must be used in conjunction with K.SPL tape splicing tool.</p>
	<h3>SMT Tape Extenders</h3> <p>Can be used with either paper, plastic, or metal tapes, punched or formed pockets, and heat sealed or PSA cover tapes. In sizes to fit 8-44mm tape widths. Use on full reels or short pieces of tape.</p>
	<h3>SMT Super Splice Tape</h3> <p>Can be used with either paper, plastic, or metal tapes, punched or formed pockets, and heat sealed or PSA cover tapes. In sizes to fit 8-44mm tape widths. With even more adhesion and available in all products.</p>
	<h3>SMT Special Splice Tape</h3> <p>Can be used with either paper, plastic, or metal tapes, punched or formed pockets, and heat sealed or PSA cover tapes. In sizes to fit 8-12mm tapes widths. Made for Panasonic Intelligent feeders.</p>
	<h3>SMT Special Splice Tape</h3> <p>Can be used with either paper, plastic, or metal tapes, punched or formed pockets, and heat sealed or PSA cover tapes in 8mm width. This tape is used when the camera system needs to see part to verify presence.</p>
	<h3>SMT 8mm Tape Cutter</h3> <p>Can be used on all types of carrier and cover tapes 8mm in width. It uses sprocket pins to align the tape for exact cutting for 2mm and 4mm pitch tape.</p>
	<h3>SMT Tape Splicing Tool</h3> <p>Can be used on all carrier and cover tapes as well as all tape widths, using sprocket pins for alignment. It's used in conjunction with brass splice clips or clip and splice tapes to rivet the carrier tape together.</p>
	<h3>Thru Hole Splice Products</h3> <p>Can be used with either paper or cardboard tape, and either radial or axial leaded taped components. Some options are more economical while others give a much stronger splice.</p>
